

OMAR OUCHCHEN

JUNIOR DATA ENGINEER | ETL/ELT & DATA QUALITY

Casablanca, Morocco | ouchcheno@gmail.com | linkedin.com/in/omar-ouchchen-11b579221 | github.com/ouchchenomar

PROFILE

Engineering graduate from ESI Rabat with banking experience in Python/SQL pipelines, PostgreSQL data modeling and data quality. Seeking a junior Data Engineering role to automate data processing and improve data reliability, from integration to reporting.

EDUCATION

École des Sciences de l'Information – ESI, Rabat 2023 – 2026
Engineering Degree – Knowledge Engineering and Data Science.

Preparatory Classes (CPGE) – Lycée Prince Moulay Abdellah 2021 – 2023
Mathematics and Physics.

PROFESSIONAL EXPERIENCE

Attijariwafa Bank – CIB, Trading Room, Casablanca Feb – Jun 2026
Final-Year Internship – Data Engineering, Data Governance and BI

Onbor project: internal platform prototype for the digital transformation of client onboarding in the Trading Room, from data entry to business approvals. Main contribution on the backend and data.

- **ETL/ELT pipelines:** designed Python/SQL processing jobs, orchestrated with Airflow and transformed with dbt, to automate data preparation.
- **Data modeling:** structured onboarding records and counterparty reference data in PostgreSQL; designed a Bronze/Silver/Gold analytics architecture.
- **Data quality:** implemented completeness, consistency, validity and uniqueness checks to identify missing, inconsistent or duplicate data.
- **Data catalog and dictionary:** contributed to the catalog built into Onbor on PostgreSQL: data types, business definitions, required fields, examples, quality rules and business/IT owners.
- **Business platform:** developed FastAPI APIs connected to React interfaces for data entry, tasks and approvals; enforced role-based transitions and logged user actions.
- **Requirements and validation:** formalized business rules and KPIs with business/IT teams; wrote documentation and acceptance test scenarios.

Stack: Python, SQL, FastAPI, PostgreSQL, Airflow, dbt, Docker, React, TypeScript, MinIO, DocuSeal.

TAMWILCOM, Rabat Jul – Aug 2025
Pre-Final-Year Internship – Document AI Assistant and Data APIs

- Developed a document ingestion pipeline: PDF extraction, cleaning, chunking, embeddings and FAISS indexing to recommend financial products.
- Exposed the services through FastAPI, built a Streamlit interface and persisted conversations in MySQL, with source display and response evaluation.

Stack: Python, FastAPI, Streamlit, FAISS, LangChain, Ollama/Mistral, SentenceTransformers, MySQL.

Doosys, Rabat Jul – Aug 2024
Introductory Internship – Odoo Development and Electronic Document Management (EDM)

- Took part in requirements analysis and Odoo customization for document management; contributed to OCR integration, testing and user guides.

Stack: Python, Odoo, PostgreSQL, OCR, EDM.

TECHNICAL SKILLS

Data Engineering: Python, SQL, ETL/ELT, Airflow, dbt, FastAPI, Docker, Git.
Modeling and BI: PostgreSQL, MySQL, SQL Server, star schema, Power BI, Power Query, DAX.
Quality and Governance: Data quality checks, data catalog, data dictionary, RBAC, audit trail.

PROJECTS

Data Quality Engine: Python/PostgreSQL engine for quality checks, scoring, anomaly history and quarantine of non-compliant data.

Power BI – Sales Tracking: data preparation with Power Query, star schema and DAX metrics by period, product, region and status.
